Save Time, Money, & Hassles.

You don't know you have a sub-par phone system until it starts breaking down, and by then your problems are just beginning. We can prevent these headaches and make your communications systems more effective which means you can focus on your business instead of your phones.

Tons of Services, Superior Reliability

We demystify the technology jargon, coordinate your dial tone and network services, and support your IT team. So when you go to work, you can rest assured your phone systems are working efficiently and with no downtime.

From small jobs to complete system overhauls, we simply provide the best customer service and expertise in the industry (and we guarantee our work 100%).

Our Clients Say it Loud & Clear...

S&W Communications – and Karen in particular – were terrific. She educated me on the available options and helped me make a decision that best fit our growing business' needs. They handled all the details including phone service selection, equipment, installation, and training. I was nervous leading a change of this type – being relatively new to the company – and they made me look good. The phones went in, service was switched over, smooth as silk. People love their new phones.

Monica Goodale, Chemtec Chemical Company

“We have relied on S&W for many years for our multiple locations, you have always been responsive and a great company to work with.”

Eli Veitzer, Director of Administration, Jewish Family Service

“When we decided it was time to upgrade our phone system, S&W helped us find the right system. We love it and especially appreciate unified messaging. Having our voicemails in our email inbox with caller ID in the subject field is fantastic, and has really made us more productive. Thanks so much.”

Mike Gardner, President, Mediterranean Heating and Air Conditioning
